

Automated Packaging Systems, Inc.

Automated Packaging Systems has been providing innovative products and exceptional customer service since 1962. The company invented the first bag-on-a-roll products and named them "Autobag®." With over 25,000 machines in operation around the globe, our products are recognized for providing world-class packaging performance.

Our Commitment to Quality

Automated Packaging Systems is committed to designing and manufacturing the highest quality products and backing them with exceptional customer service. The company's quality management system is certified to ISO 9001/2000 standards.

Certified Rebuilt Equipment

Our Certified Rebuilt Equipment Center is a state-of-the-art service and manufacturing facility with an extensive inventory of genuine equipment and parts to rebuild older packaging systems to their original specifications.

Advanced Engineering Designs

We maintain our leadership in the industry by investing in next generation technologies. Our newest packaging systems are engineered with ergonomic and technology enhancements that provide maximum value for your packaging operation with improved control, faster operating speeds, enhanced reliability, built-in diagnostics, and minimized downtime.

CERTIFIED REBUILT EQUIPMENT

- **Certified** to be rebuilt using only **Genuine Autobag®** components.
- **Certified** to original specifications by factory-trained technicians.
- **Certified** to pass a minimum 20-point inspection for quality.

Automated Packaging Systems is dedicated to providing the very best Certified Rebuilt Equipment in the industry. We guarantee our rebuilt packaging equipment to perform to its original specifications. As the inventor and original manufacturer of genuine Autobag® packaging machinery and pre-opened bags-on-a-roll, only Automated Packaging Systems can make this claim.

Our certification process ensures the best quality rebuilt systems available. Every Autobag bagger, counter, printer, conveyor and scale that we certify must first undergo a meticulous inspection and rebuilding process. We use only genuine Autobag components for consistent reliability – and thoroughly test and approve each machine before it leaves our facility.

Our factory-trained technicians are experienced and qualified to rebuild our equipment. Plus, our Certified Rebuilt Equipment is backed by a nationwide network of factory-direct field service engineers, ensuring your equipment will operate at peak performance for years to come.

What “Certified” Means to You

Greater Reliability – Extensive rebuilding and updating with only genuine Autobag components.

Upgraded Technology – Many replacement modules have been upgraded to include new hardware and software.

Factory Approved Quality – Each rebuilt system must pass a minimum 20-point inspection before it is shipped.

Technical and Field Service Support – Technical phone support and factory-direct field service engineers servicing all of North America.

Certified Equipment – We back our promise with a certificate that confirms your equipment has been thoroughly rebuilt, tested, inspected and approved as genuine Autobag Certified Rebuilt Equipment.

Our Guarantee

We guarantee our rebuilt equipment to operate and look like it did when it was new. Every certified rebuilt machine we offer carries a 90-day warranty on parts replacement and 30 days of free labor.

HS 100 Excel® with PI4000 Printer
Complete Print-n-Pack system for high-productivity applications.

Accu-Count® and DAC-1000™ Counters
Fully integrated, automatic counting systems.

Horseshoe Bagging System
Direct feeding of multiple counters for fast packaging of kits.

AutoLabel™ Precision Printer
Inline thermal transfer imprinter.

Accu-Scale® 200
Simple and accurate weigh-counting infeed system.

Maximizer™
Integrated conveyor infeed for semi-automatic loading.

Kit-Veyor®
High-productivity system for multiple component kit packaging.

HS 211 Excel® Twin
Double the productivity with a side-by-side bagger.

Customer Bill of Rights

At Automated Packaging Systems' Certified Rebuilt Equipment Center, we take great pride in bringing quality products to the marketplace. Your total satisfaction is our goal. Our philosophy is, "If you're not satisfied, then we're not satisfied." As part of our continued growth and commitment, we abide by this Customer Bill of Rights – a promise to our customers on what they should expect from our products and services.

1. You have the right to expect certified rebuilt equipment that looks and runs as if it were new.
2. You have the right to receive a copy of the Q.C. test sheet on your rebuilt equipment.
3. You have the right to certified rebuilt equipment that is reconditioned in accordance with Automated Packaging Systems' original manufacturing guidelines.
4. You have the right to receive a certified rebuilt machine that uses only genuine Automated Packaging Systems' approved components during the rebuilding process.
5. In the event there is an issue with your certified rebuilt equipment, you have the right to a rapid resolution from an Automated Packaging Systems Field Service Engineer.
6. You have the right to know the progress of your order, and have our commitment to the same high level of customer service and communication provided for all APS products and services.
